

ICC profiles from ECI

These are the ICC profiles from ECI. Besides profiles for offset printing **ECI_Offset...** and gravure printing **PSRgravure...** - based on reference characterization data according to the ISO 12647 series of standards - the ICC profile recommended by ECI as working color space, **eciRGB 1.0** is available for download. Detailed information about each profile can be found inside each download package. Additional information is provided in the section **Colour standards**.

The download archive **ECI_Offset_2004** contains the ICC profiles **ISO Coated**, **ISO Web Coated**, **ISO Uncoated** and **ISO Uncoated Yellowish**. In case you are not sure which ICC profile for offset printing to use, it is recommended to use **ISO Coated**.

The download archive **ISO_Offset_cont_2004** contains ICC profiles for continuous forms printing.

The download archives **PSRgravureLWC**, **PSRgravureMF** and **PSRgravureSC** contain ICC profiles for gravure printing (paper types **LWC paper**, **MFC paper** und **SC paper**). In case you are not sure which ICC profile for gravure printing to use, it is recommended to use **PSRgravureLWC**.

eciRGB 1.0 is the working colour space profile recommended by ECI.

To install the ICC profiles on Microsoft® Windows® 98/ME®/2000/XP®: Select the profiles in the RGB Profiles folder. While the profiles are selected, right-click and choose the Install Profile menu item. Use this same procedure for the profiles in the CMYK Profiles folder. If the Uninstall Profile menu item appears, you already have an ICC profile of the same name installed.
